MR DOUG GUYER
PROGRAM DIRECTOR
99 W. FIRST ST.
CORNING, N.Y. 14830

9/5/95

Dear Mr. Guyer

I'm a salesman and I sell cigarettes and I don't think kids should smoke. Forgetting smoke because of peer influence and family struggle, and adding another Big government program isn't the solution.

President Clinton's decision to empower the FDA to [illegible] by [illegible] product used by over 40 million adults is a dangerous solution to the problem. If Clinton is really concerned about the health of our kids, he would do something that would protect the current epidemic of the use of illegal drugs by kids and teens.

The thing that is really troublesome about Mr. President's plan is that it gives David Kessler of the FDA an unelected federal bureaucrat extraordinary power to dictate to adult Americans how to live their lives, and how American businesses should run their business. This is wrong, and should not be tolerated by the American people.

I hope the States and the American people see through this political ploy of Clinton's and this power grab by the FDA, and shut this form of Original Government down once and for all.

Sincerely,

[signature]
